2023 ANNUAL REPORT

A note on forward-looking statements

This report may contain forward-looking statements that reflect our current expectations or forecasts of future events. Forward-looking statements are inherently subject to risks, uncertainties and assumptions that could cause actual events, results, performance or prospects to differ materially from those expressed in, or implied by, these forward-looking statements. These risks, uncertainties and assumptions include general economic, political and market factors in North America and internationally, interest and foreign exchange rates, the volatility of global equity and capital markets, business competition, technological change, changes in government regulations, changes in tax laws, unexpected judicial or regulatory proceedings and catastrophic events. The foregoing list of important risks, uncertainties and assumptions is not exhaustive. Please consider these and other factors carefully and do not place undue reliance on forward-looking statements. Any forward-looking information contained in this report is current only as of the date of this report: January 31, 2024.

Message from the CEO

Dear Unitholder,

North Growth Management successfully navigated choppy markets in 2023.

After suffering its worst annual selloff since 2008 in 2022, the S&P 500 posted a massive reversal and recorded a banner 2023. However, despite the exuberant headline return of last year, underneath the surface was increasing volatility and turmoil. The S&P 500's gain was mostly driven by only seven stocks, collectively known as the "Magnificent Seven"—Apple, Microsoft, Alphabet (Google), Amazon, Nvidia, Tesla, and Meta (Facebook). Due to the unprecedented concentration and top-heavy skew of the S&P 500, much of the U.S. equity market including small-cap stocks lagged the index and remained in bearish territory during 2023.

The environment was not conducive to the outperformance of our "Growth at a Reasonable Price" investment philosophy. Yet, we are heartened that our flagship North Growth U.S. Equity Fund appreciated 21.1% in U.S. dollars (18.2% in Canadian dollars). We are also pleased that the U.S. Equity Fund ranked in the top one percent and the North Growth Canadian Equity Fund in the top 19 percent of Morningstar's Sustainability metric among all Canadian-based open-end U.S. and Canadian equity funds respectively as of December 31, 2023.

In addition to myself, Alex Joshi and Jorge Marques manage the North Growth Funds.

We recently hired a portfolio administrator to support our trading and back-office operations. Over the past two summers of 2022 and 2023, we employed university student interns to assist in the research and analysis of emerging artificial intelligence (AI) and renewable energy technologies, respectively. This coming year, we plan to continue enhancing our team, adding depth to our increasing analytical and research capabilities.

We remain faithful to our disciplined approach to investing that emphasizes conducting fundamental company research, thoroughly understanding the businesses in which the Funds invest, and avoiding investment in overvalued equities. Over the long run, this strategy of our founder, Rudy North, has delivered solid returns spanning multiple market cycles. We continue to believe that in a broad market recovery when reasonable valuations and sustainable earnings growth are rewarded, North Growth's Equity Funds are positioned well to outperform.

Here's to 2024—as we progress onwards and upwards!

Yours truly,

Erica Lau
CEO and Lead Portfolio Manager

Portfolio Management Commentary and Outlook

The S&P 500 and NASDAQ Indices closed out 2023 with strong gains. The S&P 500 ended the year just shy of its record high, driven predominantly by the seven largest U.S. technology stocks. These tech behemoths, the Magnificent Seven—Apple, Microsoft, Alphabet (Google), Amazon, Nvidia, Tesla, and Meta (Facebook)—accounted for around two-thirds of the S&P 500's 26% rally, and propelled the NASDAQ 100's 55% advance, its best year since 1999.

The rest of the U.S. equity market, however, posted more mediocre returns after a challenging 2022 of prevalent losses. In fact, up until November 2023, the equal-weighted S&P 500 was down, registering a loss, year-to-date. The concentration of the U.S. stock market reached unprecedented heights during 2023.

Apart from the frenzy around artificial intelligence (AI) and weight-loss pharmaceutical shares, most equities gyrated between gains and losses against a backdrop of much uncertainty. From banking shocks in the spring to fears of a U.S. debt-ceiling crisis in the summer and fall, and amid ongoing geopolitical conflicts around the world, market sentiment swung constantly during the year.

The widely predicted economic recession for 2023 did not materialize. The U.S. economy

remained remarkably resilient throughout the Federal Reserve's aggressive interest rate hikes. Cooling inflation and labour market data by the end of 2023 fuelled a Santa Claus stock rally as it became clear the Fed would conclude its interest rate increases and likely cut rates in 2024.

Looking ahead, we expect the coming year to be as unpredictable and volatile as the past. By and large, business executives are cautious in their outlooks given the enormity of macroeconomic and geopolitical risks. As always, we will stay disciplined and focused on stock selection based on our "Growth at a Reasonable Price" investment philosophy. Opportunities abound amid the narrow equity market breadth and extreme concentration of market returns over the past years.

ECONOMIC DISCUSSION

Not only was there no recession during 2023, but growth accelerated in the United States. Alongside economic momentum, inflation cooled sharply while employment remained robust throughout the year. Based on the final estimates released by the U.S. Department of Commerce, U.S. gross domestic product or GDP grew at an annualized rate of 2.0% in the first quarter, 2.1% in the second quarter, and 4.9% in the third quarter.

On January 25, 2024, the Commerce Department announced its preliminary estimate that fourth quarter GDP rose at an annual pace of 3.3%. Even though growth slowed in the final quarter of 2023, concerns of a dire downturn for the year did not come to fruition.

Despite rising interest rates, consumer spending was strong and grew to an all-time high. Experiences were the major beneficiary of much of the spending, as travel rebounded drastically and entertainment, as indicated by the U.S. box office, rallied immensely from its Covid-19 pandemic lows.

To meet the better-than-expected demand, businesses restocked, although business investment on equipment decelerated for the first time in two years. Government spending picked up due to federal non-defense spending associated with infrastructure investment legislation passed in 2021 and 2022. Residential investment, which had been contracting since 2021, improved slightly last year while existing home sales remained low.

The best developments of the U.S. economy in 2023 were the significant decline in inflation and solid labour market. According to the U.S. Bureau of Labor Statistics, the consumer price index (CPI) rose 3.1% in November, having gradually moderated from the 6.5% growth at the beginning of the year. Meanwhile, job creation continued to be strong in the United States. In total, the U.S. labour market

added nearly 2.7 million jobs during 2023. Excluding outsized readings from the effects of pandemic-era firings and subsequent re-hiring in 2021 and 2022, last year was the most robust for job increases since 2020 and the third highest since 2015. The unemployment rate ended 2023 at 3.7%, and the average unemployment rate for the year, 3.6%, matched 2022's statistic as the lowest since 1969.

MONETARY POLICY

During 2023, the Fed was consistent in its messaging of remaining committed to its dual mandate of maximum employment and a long-term inflation rate of 2%. Following its historic interest rate increases totalling 4.25% in 2022, the Fed raised rates at only four of its eight meetings in 2023, for a combined hike of 1.00%. The target range for the federal funds rate ended the year at 5.25% to 5.50% from 4.25% to 4.50% at the beginning of 2023.

While labour market tightness was remarkably consistent throughout most of 2023, data towards the end of the year indicated cooling job additions. Together with subsiding inflation, a more balanced labour market was welcome news for the U.S. Federal Reserve.

With the central bank's target range for interest rates at the highest since 2006, members of the Federal Open Market Committee (FOMC) viewed the benchmark policy rate as likely at or near its peak in

December. Moreover, the Fed indicated its expectation of three quarter-percentage point cuts by the end of 2024.

A pivot from the severely restrictive monetary policy to a more accommodative stance would be undoubtedly favourable for financial assets and business confidence. However, as noted in the FOMC December minutes, there remains an “unusually elevated degree of uncertainty” about the policy path. The Fed stressed “the importance of maintaining a careful and data-dependent approach to making monetary policy decisions and reaffirmed that it would be appropriate for policy to remain at a restrictive stance for some time until inflation was clearly moving down sustainably” toward the long-run 2% objective.

U.S. COMPANIES AND STOCKS

Corporate profits emerged from a slump and improved throughout 2023. As inflationary pressures moderated and economic conditions defied recessionary expectations, upside earnings surprises took hold. The third quarter of 2023 marked the first quarter of year-over-year earnings growth reported by the S&P 500 in exactly one year. Nonetheless, with lingering concerns in the market still about a possible economic slowdown, analysts lowered profit estimates for the fourth quarter and projected modest profit growth for 2024.

The North Growth U.S. Equity Fund delivered strong results in 2023. We were especially

pleased with the Fund’s superior earnings growth relative to the S&P 500 every quarter. As depicted in the “2023 Earnings Growth” chart on the following page, earnings for the Fund’s holdings on a weighted-average basis grew 6.7% year-over-year in the first quarter, increased 29.4% in the second quarter, and expanded 363.2% in the third quarter of 2023. Notably, the Fund’s aggregate jump in earnings during the third quarter was disproportionately impacted by the outsized gain reported by Abercrombie & Fitch Co. whose earnings were up 18,200% over a year ago. Excluding this extraordinary result of a holding that constitutes around 2% of the Fund, the overall portfolio generated earnings growth of 15.4% during the third quarter. For the final quarter of 2023, we again expect the earnings growth rate of the U.S. Equity Fund’s portfolio holdings to compare favourably to the S&P 500, capping an outstanding year.

We continue to be encouraged by the solid and broad-based earnings profiles of both the North Growth U.S. and Canadian equity portfolios. However, it is noteworthy that the underlying businesses of both Funds are more macro-economically sensitive than those of their respective benchmarks, the S&P 500 and S&P/TSX Composite.

INVESTMENT OPPORTUNITIES

Over the past several years, most of the U.S. stock market has underperformed the S&P 500 index. During 2023, the meaningful,

[^] Excluding Abercrombie & Fitch (ANF) 3Q earnings -- EPS \$1.83 v \$0.01 y/y

* Source for S&P 500 Index: FactSet Earnings Insight as of Jan. 5, 2024

exclusive gains of the Magnificent Seven pushed the S&P 500's concentration to new heights, its highest in decades. Consequently, the ratio between the Russell 2000, an index of 2,000 small and midsize U.S. companies, and the S&P 500 reached an all-time low.

The unprecedented degree to which the American stock market became so concentrated last year is highlighted by the significant underperformance of the equal-weighted S&P 500. The chart on page 10 titled, "A Continuing Bear Market: 2023 Ratio of Equal-weighted versus Market-weighted S&P 500 Index" illustrates the wide discrepancy in returns between the largest technology stocks and the other constituents. As of the start of November 2023, the equal-weighted S&P 500 was posting losses for the year. Even after a stunning rally during the

final two months, the equal-weighted S&P 500 was up only 14% in 2023, substantially lower than the official S&P 500's 26% total return.

As a result of an extended period of concentrated returns among few stocks and narrow U.S. equity market breadth, an abundance of attractive investment opportunities persists for active managers. Numerous solid businesses continue to trade at discounts relative to their growth records and potential. High-quality, reasonably-priced stocks are readily available, and we continue to position the Funds to outperform in a broad market recovery.

OUTLOOK FOR 2024

We are not market timers, nor do we make decisions based on top-down economic

A Continuing Bear Market 2023 Ratio of Equal-weighted versus Market-weighted S&P Index

forecasts. Given continued extreme uncertainty over the economy and geopolitical events, market volatility is likely to remain elevated in 2024.

This year, as always, we will stay the course—dedicating all our energy and efforts on fundamental analysis and individual stock selection. Focused on the long-term, we will continue to actively manage the equity portfolios according to our well-established “Growth at a Reasonable Price” investment philosophy.

2023 Performance Review

NORTH GROWTH U.S. EQUITY FUND

In the aftermath of a year characterized by a notable -18.1% decline in the S&P 500 in 2022, marking its most significant downturn since 2008, the index demonstrated resilience by staging a robust recovery, surging by 26.3%. All major indices that we regularly track experienced appreciation, with the S&P 400 Midcap and the S&P 600 SmallCap Indices posting gains of 16.4% and 16.1%, respectively. The NASDAQ Composite, known for its tech-heavy composition, emerged as the frontrunner, registering an impressive appreciation of 44.7%.

During 2023, the North Growth U.S. Equity Fund increased 21.1%, underperforming the S&P 500 Index by 5.2%. Taking the weaker U.S. dollar into account, the Fund gained 18.2% in Canadian dollars compared to the S&P 500 Index Canadian dollar return of 23.3%.

Markets were strong in 2023, primarily propelled by the performance of seven key stocks, namely Apple, Microsoft, Alphabet, Amazon, Meta, Nvidia, and Tesla— the Magnificent Seven. An equally weighted Bloomberg Index monitoring the Magnificent Seven's return (Bloomberg Magnificent 7 Total Return Index) soared by an impressive 107.0% in 2023. In contrast, an equal-weighted S&P 500 Index saw a comparatively modest

appreciation of only 13.9%, accentuating the concentration of the index's performance.

The relative underweighting or lack of exposure in the Magnificent Seven detracted from our relative performance. We are disappointed with the magnitude of the underperformance but believe that our discipline in investing in stocks that possess strong long term growth prospects at reasonable valuations will position us well when markets reward earnings rather than multiple expansion alone.

2023 Performance Review

NORTH GROWTH CANADIAN EQUITY FUND, SERIES N

Following the same trend as 2022, 2023 was a tale of two halves for the North Growth Canadian Equity Fund.

If the year had ended in June, the North Growth Canadian Equity Fund, Series N, would have outperformed with a return of 7.4% while the S&P/TSX Composite returned 5.8%. Technology, Consumer Discretionary and Industrials (of which transportation is a sub-sector), the three largest sectors within the North Growth Canadian Equity Fund by allocation, were also the top performers in the S&P/TSX Composite. The Fund held meaningful positions in two of the top 10 performers in the index: ATS Corporation and Open Text Corporation.

The second half of the year was a difficult one for the Fund. The North Growth Canadian Equity Fund, Series N, underperformed with a loss of -4.8% while the S&P/TSX Composite returned +5.7%. The S&P/TSX Composite's performance was led by Health Care, Technology and Financials. The Fund held meaningful positions in two of the bottom 10 performers in the index: Aritzia and Innergex Renewable Energy.

In 2023, the Fund was up 2.5% compared to the S&P/TSX Composite which gained 11.8%. After the blistering pace at which the Bank

of Canada hiked interest rates in 2022, there was moderation with only 0.75% of rate hikes in 2023. While a soft-landing—slowdown in inflation without a significant economic recession—would be the ideal outcome, monetary tightening usually acts with a lag. This was evident as the Canadian economy shrank by -0.3% in the third quarter of 2023, six quarters after the first rate hikes began in the first quarter of 2022. This marked the Canadian economy's first decline since the second quarter of 2021. The result underscored the fact that higher interest rates from the Bank of Canada are showing up in the Canadian economy, backtracking from robust growth earlier in the year.

The S&P Global Canada Composite PMI (Purchasing Managers Index) edged lower in December, the seventh consecutive decline in activity in the Canadian private-sector economy. New orders at the aggregate level contracted at the fastest pace in over three years, pressured by poor demand in both goods and services. The lower demand for capacity drove private-sector firms to reduce headcounts with the unemployment rate hitting a 22-month high by December 2023. With rising unemployment, consumer credit in Canada also rose, setting an all-time record. Housing starts dipped in 2023 notwithstanding the highest rate of population growth since 1957.

* Source for S&P/TSX Composite Index: Bloomberg

Despite a weak economic outlook, the underlying companies in the North Growth Canadian Equity Fund continue to make progress. Over time, earnings are the primary driver of share prices. During 2023, the Fund's holdings delivered growth in earnings that significantly beat those of the S&P/TSX Composite. The performance of the Fund's holdings in 2023 is shown by the graph above.

CANADIAN MARKET COMMENTARY

The overarching investment philosophy of the North Growth Canadian Equity Fund remains "Growth at a Reasonable Price". The Fund has always focused on fundamental, bottom-up security selection.

An index fund employs a momentum strategy—acquiring more of what is already

performing well, with no consideration for value. This leads to prolonged cycles of performance. With every additional dollar invested in an index fund, a larger portion is allocated to the best-performing stocks, which then leads to an increase in their weight within the index.

When these stocks stop performing, it takes a long time for their weights to come down, leading to long periods of stagnation. Portfolio managers have found it hard to resist the siren song of large companies. Many active funds increasingly resemble the very indices they aim to outperform.

The North Growth Canadian Equity Fund is a concentrated portfolio that consists of some high conviction bets. While the index holds over 230 names, the Fund holds 31.

An actively-managed portfolio, the Fund is comprised of high-conviction picks from a “market of stocks” and is not invested in the “stock market”. The Fund does not aim to replicate the index.

News headlines have rarely been good. Since the turn of the millennium, the world has survived wars, recessions, a pandemic and even an apocalypse as predicted by the Mayan calendar in 2012.

Economic output and corporate profits—the engines of prosperity—have continued to progress despite the bad news. Good companies have endured and adapted to changing geopolitics, monetary or fiscal policies and black swan events. Since 2000, the TSX Composite is up more than 360%.

Equities remain the best investment asset class for long-term capital growth. And the North Growth Canadian Equity Fund is positioned the same way it has always been, managed with the same investment philosophy. When the pandemic hit in 2020, the Fund added positions in economically-sensitive stocks that fit “Growth at a Reasonable Price” which helped drive strong performance for the ensuing years. When inflation started rising and negative forecasts were the rage, the Fund again stuck by the same philosophy. We remain optimistic in the long run performance of our portfolio.

North Growth Canadian Equity Fund received FundGrade A+ Award for four consecutive years

Portfolio Managers: Jorge Marques and Alex Joshi

Awarded in 2020, 2021, 2022, 2023

2023 Performance Review

NORTH GROWTH CANADIAN MONEY MARKET FUND

The Money Market Fund's current yield at the end of 2023 was 4.94%, up 74 basis points or 0.74% from its 4.20% yield at the beginning of the year. In 2023, the Fund returned 4.73% net of fees, 3 basis points or 0.03% below the 4.76% for 30-day Treasury Bills. Over a five-year period, the average annual return for the Fund was 1.75%, 0.01% below the 1.76% average annual return for 30-day Treasury Bills.

After increasing interest rates aggressively by 4.00% during 2022, the Bank of Canada raised its overnight lending rate at only three of its eight meetings in 2023. The central bank lifted its key benchmark rate by 0.25% in each of January, June, and July, totalling 0.75% for the year. The Bank of Canada's target overnight rate remained constant after the July raise

and ended 2023 at 5.00%, up from 4.25% where it began the year. Canada's economic growth stalled and inflation eased meaningfully during 2023. Resolute in its commitment to restoring price stability, the Bank of Canada communicated over multiple statements that it remains prepared to raise the policy rate further if needed.

Due to the short average maturities within the Money Market Fund of approximately 30 days, the direction of the Fund's current yield corresponds closely with the direction in Canadian short-term interest rates. The Fund continues to invest in a well-diversified portfolio of Canadian money market securities with an emphasis on high credit ratings.

ANNUAL PERFORMANCE RESULTS

This data gives you insight into the typical annual variations in investment results. Annual results explain how long term results come about and will reveal whether a record is dependent largely on earlier results, more recent results, or more ideally a balance of both. This data also shows that our outstanding long term results were not achieved by having stellar results in every single year. In equity investing, it should be noted that performance results may periodically fall below expected or desired

levels and this is why we emphasize these longer term results in the evaluation of performance. Furthermore, a year or more of exceptionally strong performance should not give rise to unreasonably high long term expectations. A superior long term record does not mean every year was (or will be) exceptional but it does mean that despite some years of low returns we have delivered on our mandate to provide superior long term results.

North Growth U.S. Equity Fund Portfolio

Abercrombie & Fitch Co. — is a leading, global specialty retailer of apparel and accessories for men, women and kids through five renowned brands including Abercrombie & Fitch, abercrombie kids, Hollister, Gilly Hicks, and Social Tourist.

Align Technology, Inc. — designs and manufactures the Invisalign system, intraoral scanners, and computer-aided design software. Align mass-customizes aligners to treat cases ranging from overbite to general teeth straightening.

Apple Inc. — is one of the leading technology companies in the world. The company designs, manufactures and markets mobile communication and media devices and personal computers. It also sells a variety of related software and services. Some of the company's most popular hardware products include the iPhone, iPad, Mac, Apple Watch, AirPods and Apple TV.

Applied Materials Inc. — provides manufacturing equipment, services, and software primarily to the semiconductor and display industries. Its semiconductor segment offers a portfolio of products that help customers fabricate semiconductor chips and improve device performance, yield, and cost. The display and adjacent markets segment sells leading edge products used in

the manufacture of screens for TVs, personal computers, mobile phones, and other consumer-oriented devices.

Arhaus Inc. — is a lifestyle brand and omni-channel retailer of premium home furnishings. Through a differentiated proprietary model that directly designs and sources products from leading manufacturers and artisans around the world, Arhaus offers an exclusive assortment of heirloom quality products that are sustainably sourced, lovingly made, and built to last.

Atkore Inc. — is a leading provider of electrical, safety and infrastructure solutions. The company manufactures and supplies metal products and electrical raceway solutions. The company offers steel tubes and pipes, electrical conduit, armored wire and cable, cable trays, metal framing systems, and building components.

Axonics Inc. — is a global medical technology company that is developing and commercializing novel products for adults with bladder and bowel dysfunction. The company is in the process of being acquired by Boston Scientific Corporation (NYSE: BSX).

Biogen Inc. — discovers, develops, and delivers worldwide innovative therapies for people living with serious neurological

and neurodegenerative diseases, including multiple sclerosis, spinal muscular atrophy, and Alzheimer's disease.

Booking Holdings Inc. – engages in the provision of online travel and related solutions. The company offers services through the following brands: Booking.com, KAYAK, priceline, agoda, Rentalcars.com, and OpenTable.

Brinker International Inc. – is one of the world's leading casual dining restaurant companies and home of Chili's® Grill & Bar, Maggiano's Little Italy® and virtual brand: It's Just Wings®.

Charles River Laboratories International, Inc. – provides essential products and services to help pharmaceutical and biotechnology companies, government agencies and leading academic institutions around the globe accelerate their research and drug development efforts.

Ciena Corporation – is a supplier of telecommunications networking equipment, software, and services. Its products support the transport, switching, aggregation, delivery and management of voice, video, and data traffic on communication networks. Ciena's customers include telecom service providers, cable companies, large enterprises, and government entities.

Coherent Corporation – previously II-VI Inc., is a vertically integrated manufacturing

company that develops, manufactures, and markets engineered materials, optoelectronic components and devices, and lasers for use in industrial materials processing, optical communications, aerospace, and defense, and more.

Crocs, Inc. – designs casual footwear for men, women, and children. The company's brands include Crocs—clogs made with a proprietary material, and HEYDUDE—a loafer popular with teens.

Electronic Arts Inc. – develops, publishes, and distributes interactive entertainment software for video game consoles, personal computers, handheld game devices, and mobile phones.

Elevance Health, Inc. – previously Anthem, Inc., is one of the largest health benefits companies in the United States. It provides health, dental and vision, and pharmacy benefits, as well as life and disability insurance.

FedEx Corporation – provides worldwide express delivery, ground small parcel delivery, less-than-truckload freight delivery, supply chain management services, customs brokerage services and other related business services.

Fortune Brands Innovations, Inc. – provides a portfolio of products for the home that includes faucets, sinks, showers, doors, composite decking, and security locks.

Global Payments Inc. – is a leading payments technology company delivering innovative software and services to their customers globally.

HP Inc. – is a technology company that operates in two primary segments: Personal Systems and Printing. Its Personal Systems unit provides commercial and consumer personal computers, notebooks, workstations, tablets and other related devices and services. Its Printing unit provides printer hardware, supplies, solutions, and related services to both the consumer and commercial markets.

InMode Ltd. – develops, manufactures, and markets patent protected, minimally-invasive, radiofrequency-based devices for uses in plastic surgery, gynecology, dermatology, otolaryngology, and ophthalmology.

Integer Holding Corporation – is one of the largest medical device outsource (MDO) manufacturers in the world serving the cardiac, neuromodulation, vascular and portable medical markets.

Jabil Inc. – is a manufacturing solutions provider with over 200,000 employees across 100 locations in 30 countries. The world's leading brands rely on Jabil's unmatched breadth and depth of end-market experience, technical and design capabilities, manufacturing know-how, supply chain insights and global product management expertise.

Jacobs Solutions Inc. – engages in the provision of a diverse range of technical, professional, and construction services to industrial, commercial, and governmental clients.

Johnson Controls International plc – provides building products and technology solutions to customers around the world. Its products include air systems, building management, heating, ventilating, air-condition (HVAC) controls, security, and fire safety solutions.

Lumentum Holdings Inc. – is a market-leading designer and manufacturer of innovative optical and photonic products enabling optical networking and laser applications worldwide.

MasterBrand, Inc. – previously Fortune Brands' cabinet business, the new independent company is the largest manufacturer of residential cabinets in North America.

Microsoft Corporation – develops and sells software, subscription-based cloud services, and devices to businesses and consumers. The company is perhaps best known for its Windows operating system, Office productivity suite, LinkedIn professional network, Azure cloud services, Xbox gaming consoles, and partnership with OpenAI.

Motorola Solutions Inc. – is a leading provider of public safety and mission-critical communication infrastructure, devices, accessories, and services.

NVIDIA Corporation. — designs, develops, and markets graphics processors and related software. NVIDIA's invention of the GPU in 1999 sparked the growth of the PC gaming market, redefined modern computer graphics and revolutionized parallel computing. More recently, GPU deep learning ignited modern AI — the next era of computing — with the GPU acting as the brain of computers, robots and self-driving cars that can perceive and understand the world.

NVR Inc. — is one of America's leading homebuilders. The Company serves homebuyers in thirty-five metropolitan areas in fifteen states.

Old Dominion Freight Line, Inc. — is one of the largest less-than-truckload motor carriers in North America. The company provides regional, inter-regional, and national shipping services, including expedited transportation.

Qualcomm Inc. — is a global leader in the development and commercialization of foundational technologies for the wireless industry. Its inventions have helped power the growth in smartphones.

RH — provides home furnishing products and design services. The Company offers its collections through its retail galleries across the world.

SolarEdge Technologies Inc. — designs and sells power optimizers that attach to the back

of solar panels and inverters that harvest and convert the panel-generated energy from direct current (DC) into the usable alternating current (AC). Its differentiated technology maximizes the power generation at the individual solar module level while lowering the cost of energy produced by the solar photovoltaic system.

Tapestry Inc. — is a leading house of modern luxury accessories and lifestyle brands, including Coach, kate spade New York, and Stuart Weitzman. The company is in the process of acquiring Capri Holdings Ltd. (NYSE: CPRI)

Tempur Sealy International, Inc. — develops, manufactures, markets, and distributes bedding products. Its products include mattresses, adjustable bases, pillows and other sleep and relaxation products.

Texas Instruments Inc. — designs and makes semiconductors that are, in turn, sold to electronics designers and manufacturers worldwide. The company's broad portfolio of products is used in a wide range of applications and target the personal electronics, automotive, communications, enterprise, and industrial markets.

Thermo Fisher Scientific, Inc. — is a global leader in scientific research services, providing life sciences solutions, analytical instruments, and specialty diagnostics. The company offers a diverse range of products and services,

including reagents, instruments, and laboratory equipment for genomics, proteomics, clinical diagnostics, and pharmaceutical development.

Ulta Beauty, Inc. – is an American chain of beauty stores. Ulta Beauty carries both high-end and low-end cosmetics, fragrances, nail products, bath and body products, beauty tools and haircare products.

United Rentals, Inc. – is the largest equipment rental company in the world. The company offers approximately 4,600 classes of equipment for rent. United Rentals serve construction and industrial customers, utilities, municipalities, homeowners and others.

Warner Bros. Discovery Inc. – is a global media and entertainment company that creates and distributes content. Their brands include HBO, Warner Bros., DC Superheroes, CNN, Discovery Channel, HGTV, Food Network, and more.

Watts Water Technologies, Inc. – engages in the manufacture and provision of products for water conservation, safety, and flow control. Its services include plumbing and flow control solutions, water quality and conditioning, water reuse and drainage, heating, ventilation, and air conditioning, and municipal waterworks.

West Pharmaceutical Services, Inc. – is a leading global manufacturer in the design and production of technologically advanced, high-quality, integrated containment and delivery systems for injectable medicines.

North Growth Canadian Equity Fund Portfolio

Aritzia Inc. – is a vertically integrated, innovative design house of exclusive fashion brands. Its unique multi-brand portfolio and product mix allows flexibility to address evolving fashion trends and to appeal to clients across multiple life stages.
