

MARCH 2024 MONTHLY REPORT

APRIL 5, 2024

Market and Fund Performance Update

March capped an exceptional first quarter performance for U.S. equities. Even as the market scaled back its expectations for rapid interest rate cuts as unexpected increases in inflation readings were observed in January and February, indications of resilient economic growth and enthusiasm around artificial intelligence drove the S&P 500 to close at 22 separate record highs during the first quarter of 2024.

U.S. EQUITY FUND

In March, the North Growth U.S. Equity Fund appreciated 2.9%. The Fund underperformed the S&P 500 which gained 3.2% as well as the S&P 400 MidCap and S&P 600 SmallCap indices which were up 5.6% and 3.2% respectively. The Fund beat the NASDAQ Composite which rose 1.9%. A slightly stronger Canadian currency reduced the Fund's monthly return to 2.8% in Canadian dollars versus the S&P 500's 3.1% Canadian-dollar March return. Year-to-date, in Canadian dollars, the Fund is up 16.1% versus the S&P 500's 13.3% gain.

HOPING FOR A BROADER STOCK MARKET...

U.S. equities appreciated despite the Magnificent Seven trade fizzling. All of the S&P 500's sectors, except real estate, gained so far this year. Small caps, industrial, and financial stocks also participated in the rally, an encouraging signal that the market may be broadening.

Nonetheless, the Russell 2000 index of 2,000 small and midsize U.S. companies was up less than half of the S&P 500's rise year-to-date. Furthermore, **the returns of both the S&P 500 and Russell 2000 indices remain highly concentrated**. Nearly half of the S&P 500's advance was accounted for by the new Fab Four technology behemoths—Nvidia, Meta Platforms (Facebook), Microsoft, and Amazon.

As shown by the following tables, 70 (of 500) companies represent all of the S&P 500's gain whereas only 56 (of 2,000) companies constitute the Russell 2000's increase during the first quarter. The U.S. stock market remains top-heavy, dominated by the largest capitalization companies.

STICKING TO "GROWTH AT A REASONABLE PRICE"

Opportunities abound given the continued narrow equity market breadth and extreme concentration of market returns. We remain focused on the fundamental characteristics of individual equities, adhering to our long-standing principles of active management and stock selection. As always, we are steadfastly disciplined in identifying and picking stocks that fit our "Growth at a Reasonable Price" investment philosophy.

* The Current Yield for the Money Market Fund is the average of the annualized daily yield for the most recent seven-day period. This measure is no longer available for the 30-day T-Bill Index.

We take a very simple approach to managing the North Growth Canadian Money Market Fund. We invest in a portfolio of high-quality short-term bonds. The average maturity of the portfolio is often around 30 days. Historically, the Fund has generated very competitive yields with this simple approach because of our 0.25% management fee.

We manage the portfolio to ensure high liquidity and have no intention to extend maturies or reduce the quality of the holdings. We believe the Fund has superior liquidity characteristics due to its very low average maturity. The North Growth Canadian Money Market Fund's yield tends to correspond with changes in the Bank of Canada's overnight rate.

The current yield quoted above is net of the management fee.
